DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/16/2009 has been entered.
2. The amendment dated 03/17/2009 has been considered and entered for the record. The amendment overcomes the previous rejections, therefore making all claims allowable over the prior art.

Allowable Subject Matter

3. Claims 3, 5, 6 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art of record is Okada et al. (US 2002/0035044) who teaches a lubricating oil composition for internal combustion engines, i.e. automobile engine oil [0002, 0076] having 1 to 20 % by weight of ethylene-propylene copolymer having 40 – 77% ethylene content, Mw/Mn is 2.4 or less, and a melting point of 60°C or less (abstract) which overlaps the claimed range of 30°C or less, .05 to 5% by weight of pour point depressant [0213], a lubricating oil base such as mineral oil or poly- α -olefin [0190]. Okada teaches the pour point depressant is ACLUBE 133

which has a melting point of -13C, which does not meet the limitation required by claim 3. No other reference in the prior art teaches the melting point of a pour point depressant in the range claimed. Therefore claim 3, and the dependent claims 5, 6 are allowable over the prior art.
